

Homework Programming Logic and Design Chapter 1 Part 2

For each of the following questions, find the inputs and outputs, create the flowchart or pseudocode, desk check the flowchart or pseudocode.

1. A bagel store wants a program to calculate a customer's order. The customers can purchase bagels, donuts, and/or coffee. Bagels are 0.99, donuts are 0.75, and coffee is \$1.20.
2. Create a program that accepts three numbers. The program will find and display the average of the numbers.

For this last problem, correct the flowchart by creating a structured one. You can use a free tool called Lucidchart on the web to create your flowchart.

3.
