

Homework Programming Logic and Design Chapter 5

For each of the following questions, find the inputs and outputs, create the pseudocode, and desk check.

1. Write a program that will add up the sum of a series of numbers starting at 1 up to the number entered as in $1 + 2 + 3 + 4 + 5 = 15$, where 5 was the number entered.
2. Write a program that will sum the positive integers entered by a user. The user will input integers until they want to stop. At that point they will enter q to quit.
3. Create an addition table that outputs the values below:

	1	2	3	4	5
1	2	3	4	5	6
2	3	4	5	6	7
3	4	5	6	7	8
4	5	6	7	8	9
5	6	7	8	9	10
